

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: January 13, 2005/1330

Site Contact(s): Robert Richardella
Phone: 303-994-8246

Regulatory Contact: Denise Onyskiw
Phone: 303-692-3371

Agency: CDPHE

Purpose of Contact: Discuss Demolition of B559

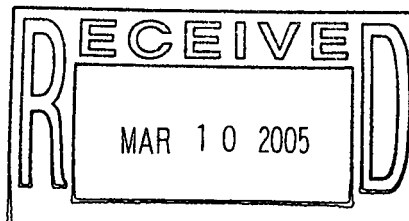

Discussion

The RISS PDS team has been performing surveys in B559 for a number of weeks. Survey results indicate the presence of very low levels of loose and fixed contamination in the administrative area, equipment area and the controlled area of the building.

A meeting was held to discuss the survey results and to decide whether further decontamination actions were warranted. Taken into account in the decision process were the adequacy of the surveys, the low levels of remaining contamination, the risk to workers associated with additional decontamination efforts, and the estimated effectiveness of additional decontamination efforts.

The following agreements were reached:

- Further decontamination efforts are not warranted in the administrative area and equipment area. Surfaces and equipment in these areas will be sprayed with fixative based on survey results. Post fixative surveys will be performed to verify that there is no loose contamination.
- Further decontamination efforts are not warranted on the floor, walls, or ceiling of the controlled area. These surfaces will be sprayed with fixative. Post-fixative surveys will be performed to verify that there is no loose contamination.
- The recirculation ducting will be surveyed following washing. The ductwork will be surveyed and fixative applied to the extent practical. Post-fixative surveys will be performed. The recirculation tunnel will be washed, surveyed and fixative applied. Post-fixative surveys will be performed.
- The PDS team will survey the B561 structure to determine if free release is possible.

-The PDSR will provide the record of activities associated with decontamination and fixative application. The PDSR will include the requisite documentation.
